Hi Namaste!

I am Panjo Suerpa, forest Guardian of Red Panda Network for Dearali community forest, Taplejung.

Thank you so much for supporting us in the conservation of red panda of my village. I visit my forest every month to collect data of red panda on its conservation and threats. Which I submit to Red Panda Network.

Recently, I have also learned to build a nursery of Taxus plants in my village from a technician of ITAM. After that I have trained some 25 people to build a same nursery in another village. Which has helped me to build my confidence ^{work} and also the earning opportunity. The money I earn from being a forest Guardian and trainer of building a nursery has been helping me to continue my study of Bachelor-level. My parents are not able to support my study.

Thank you.

Panjo Suerpa
